

stormBLOX™

Each stormBLOX™ system is a complete, membrane-based, physical / chemical (P/C), treatment process designed to cost-effectively treat (manage) storm flows and reliably serve as emergency flow management in the event of biological process upsets.

KEY FEATURES

- Smallest footprint (50% of MBR)
- No air scouring required
- No tanks required

MAIN ADVANTAGES

- Modular and extremely scalable
- Extremely energy efficient
- Readily taken in and out of service based on need

FOCUS MARKETS & APPLICATIONS

- MBR WWTPs with peak flows greater than 3
